I captured all of the screens showing what took place But, IMO, it boils down to them trying to use scare tactics so that you'll use paid support to try and 'fix' the issues that were supposedly detected.. For example, skyglider reported problems where Comodo wanted to use their tech support to solve them in this post I had never seen the Comodo AntiError Program running on my PC, and had never seen suggestions to use their tech support via GeekBuddy, as I reported in posts like this one: So, to try and figure out why others were seeing that behavior, I reinstalled Comodo internet Security again. I still did not see that kind of behavior So, I decided to deliberately start the AntiError software (under the Start Menu>All

Programs>Comodo>Geek Buddy>AntiError to try and determine what others were reporting Sure enough, that program reported that I have issues, and a screen popped up offering support.. I'll probably publish more details later, as I made sure to capture screens of my online correspondence, and I'm shocked at Comodo representative's behavior.. Another one bites the dust! I understand your anger Download Free Comodo FirewallError 200 and 201.. So, please accept my apologies for suggesting them to begin with Yes, they have great software that can help you to prevent malware infection. I already had all exes in the ESO folder set as exceptions in Comodo Internet Security Premium.. 108 0 is n PrivDog, Help - PrivDog, Bug Reports - PrivDog: Comodo Verification Engine.. 200's followed by 108's Jan 30, 2018 Comodo Firewall, AntiVirus and Defense+ PrivDog 3.. That kind of thing is unforgivable in my book, no matter how good their AV software is.. Download Free Comodo FirewallComodo Firewall Windows 10Comodo Firewall Update Error 113I've been using Comodo's Firewall Product for a long time, as I loved it's Default Deny Protection so that it blocked any suspicious behavior from applicatoins.. IOW, it's really good software for that purpose For whatever reason, I did not see some of the issues reported by others here.. I've been a big fan of Comodo in the past, as I really like their default deny approach to preventing malware infections. 773a7aa168 [STEINS:GATE Crossover key serial number](#)
